

NAV APPROACH MODES

VOR approaches without a valid DME signal are **prohibited** with autopilot coupled or with flight director in **NAV** or **APP** mode. (*Use Heading Mode and Monitor CDI*)

- **APP Mode** for increased sensitivity On VOR Approaches (with DME)
- **NAV Mode** on LOC Approaches
- LOC BC (Back Course) Place *Front Course* in the PFD Course Selector and Select **BC** on the Flight Director Mode Controller
