

## TCAS II

Solid Yellow Circle (TA) - When intruder aircraft is 20 to 48 seconds from Closest Point of Approach (CPA), depending on altitude.

Solid Red Square (RA) - Alert and Maneuver Guidance information. Issued when a threat aircraft is 15 to 35 seconds from CPA, depending on altitude.

Solid Cyan or White Diamond (Proximate Traffic) - An intruder less than 6 NM away and within  $\pm 1200$  feet from your aircraft and not currently a potential conflict.

Open Cyan or White Diamond (Proximate Traffic) - Other traffic; beyond 6 NM and/or greater than  $\pm 1200$  feet from own aircraft.

Resolution Advisory Annunciations - Maneuver should begin within 5 seconds.

Increased Action Resolution Advisory Annunciations - maneuver should begin with  $2\frac{1}{2}$  seconds.

NORM Position:

Displays 2700' Above/Below

Above/Below Position:

An additional 4300' to the NORM

\* These are display functions only. TCAS monitors 7000' above/below the aircraft at all times.
